

Working Papers 2018

Bringing it all Together

With powerful document management, real-time collaboration, online review, efficient clean-up, sophisticated lockdown and advanced roll-forward, Working Papers empowers you to work smarter and faster than ever before.

Effective Collaboration

Allow team members to collaborate effectively on an engagement file in real time even when in different locations.

Reduce Errors

Leverage automation to ensure data is always consistent; when you make an adjustment, all affected information is updated.

Embedded Continuity

Automatically roll-forward identified client data from year to year to ensure continuity and reduce workload.

Accessible Data

Enhance engagement transparency and address questions by retaining all information and supporting materials in one location.

CASEWARE®

Key Features of 2018

Materiality Guidelines

Within our suite of Audit products, automatic documents - like analytical review, leadsheet, trial balance - now display materiality guidelines from the materiality worksheet.

Data Visualization

Better visualize year-on-year changes and key relationships in your accounts with graphs of the data from your lead sheets.

Two-Factor Authentication

Enabling two-factor authentication in the Cloud ensures data is secure by reducing the risk of data breaches. Staff and contacts can choose to enable this feature at their own discretion.

Improved Template Update Process

Within the synchronization environment, an improved update process has been implemented. Updating template documents in a client file no longer requires all synchronized copies to be online or abandoned.
